

PITHANI HIMASRI

Hyderabad, Telangana | +91 9347799754 | himasri17.p@gmail.com

PROFESSIONAL SUMMARY

Final-year B.Tech student in AI & Data Science with hands-on experience at IIIT Hyderabad's LTRC, skilled in building end-to-end data analytics, machine learning, and backend systems. Delivered a full-stack MWE/NE annotation tool (React, FastAPI, MongoDB, NLTK), a RAG-based video comparison chatbot (Qdrant, Ollama), and analytics platforms applying RFM segmentation and statistical modeling on real-world datasets.

CORE SKILLS

Programming: Python, SQL, JavaScript

AI & ML: Machine Learning, Prompt Engineering, RAG, Recommendation Systems, BERT Score

Data Analytics: Pandas, NumPy, Data Cleaning, Data Visualization, Exploratory Data Analysis (EDA)

Frameworks: Flask, FastAPI, React.js, Streamlit, Scikit-learn, TensorFlow

Databases: PostgreSQL, MongoDB, MySQL

Tools & Technologies: Git, GitHub, Jupyter Notebook, VS Code, Google Colab, Power BI, Docker

PROFESSIONAL EXPERIENCE

Research Intern | Language Technologies Research Center, **IIIT-Hyderabad**

Sep 2025 – Mar 2026

Built a multilingual NLP tools and annotation pipelines, including Domain Term Identification with automated PDF processing and structured data export. Evaluated multilingual NLG models using BERT Score, achieving 93% F1 for Hindi and 88% F1 for English, enabling the selection of the best-performing prompt version. Contributed to the Aahaar Vidhi Ayurvedic application by designing UI/UX in Figma and organizing domain-specific data for backend integration.

EDUCATION

Bachelor of Technology (Computer Science – Artificial Intelligence & Data Science)

Kakinada Institute of Engineering and Technology

2023-2027

CERTIFICATION

NPTEL Data Analysis with Python

2026

Foundation of Modern Machine Learning

2025

PROJECTS

Retail Analytics Platform

Developed a full-stack retail analytics dashboard with sales, customer, and product insights, RFM segmentation, SQL analytics, and interactive visualizations (Python, FastAPI, PostgreSQL, React, Power BI).

MWE & Named Entity Annotation Platform

Developed a multilingual role-based annotation platform for MWE and NER datasets with document management, review workflows, and training data export (Python, Flask, React, MongoDB).

RAG Chatbot

Developed a Retrieval-Augmented Generation (RAG) chatbot for comparing YouTube videos and Instagram Reels using transcript processing, vector search, and Large Language Models (Python, Qdrant, Mistral via Ollama).

AWARDS

Academic Topper, 1st Semester, KIET (2023)

Outstanding Certificate, Foundation of Modern Machine Learning (2025).
